Price: **\$0.99**

Website: <http://www.mustafadur.com/smsblocker/>

App Store: <https://itunes.apple.com/app/id1015444485>

Are you tired of spam message? Then SMS Spam Blocker is the right solution for you. SMS Spam Blocker will stop the annoyance of advertisements and spam messages. You can either filter all unknown senders or filter according to rules you create. You will not get any notification when spam message arrives. This application will help you to have clean and organized SMS inbox. No more distraction!

Features

- Block unknown senders

It will filter all messages if sender doesn't exist in your contact list

- Block links

If message contains any link (web, e-mail), message will be filtered

- Flexible rules

You can create complex rules for filtering. You can create rules based on sender or message content. Rule type can be either simple compare or complex Regex rule to filter sender based on number of digits. You can add your rules to following list

1. White List

Message will be accepted if you have any rule that matches in this list.

2. Black List

Message will be filtered if you have any rule that matches in this list.

- Artificial Intelligence

Besides white and black list, this application also has an Artificial Intelligence(AI). If you activate it, you can filter SMS messages even though they don't appear in your rules. Please be aware that AI is trained on small amount of messages therefore it is impossible to identify every message correctly

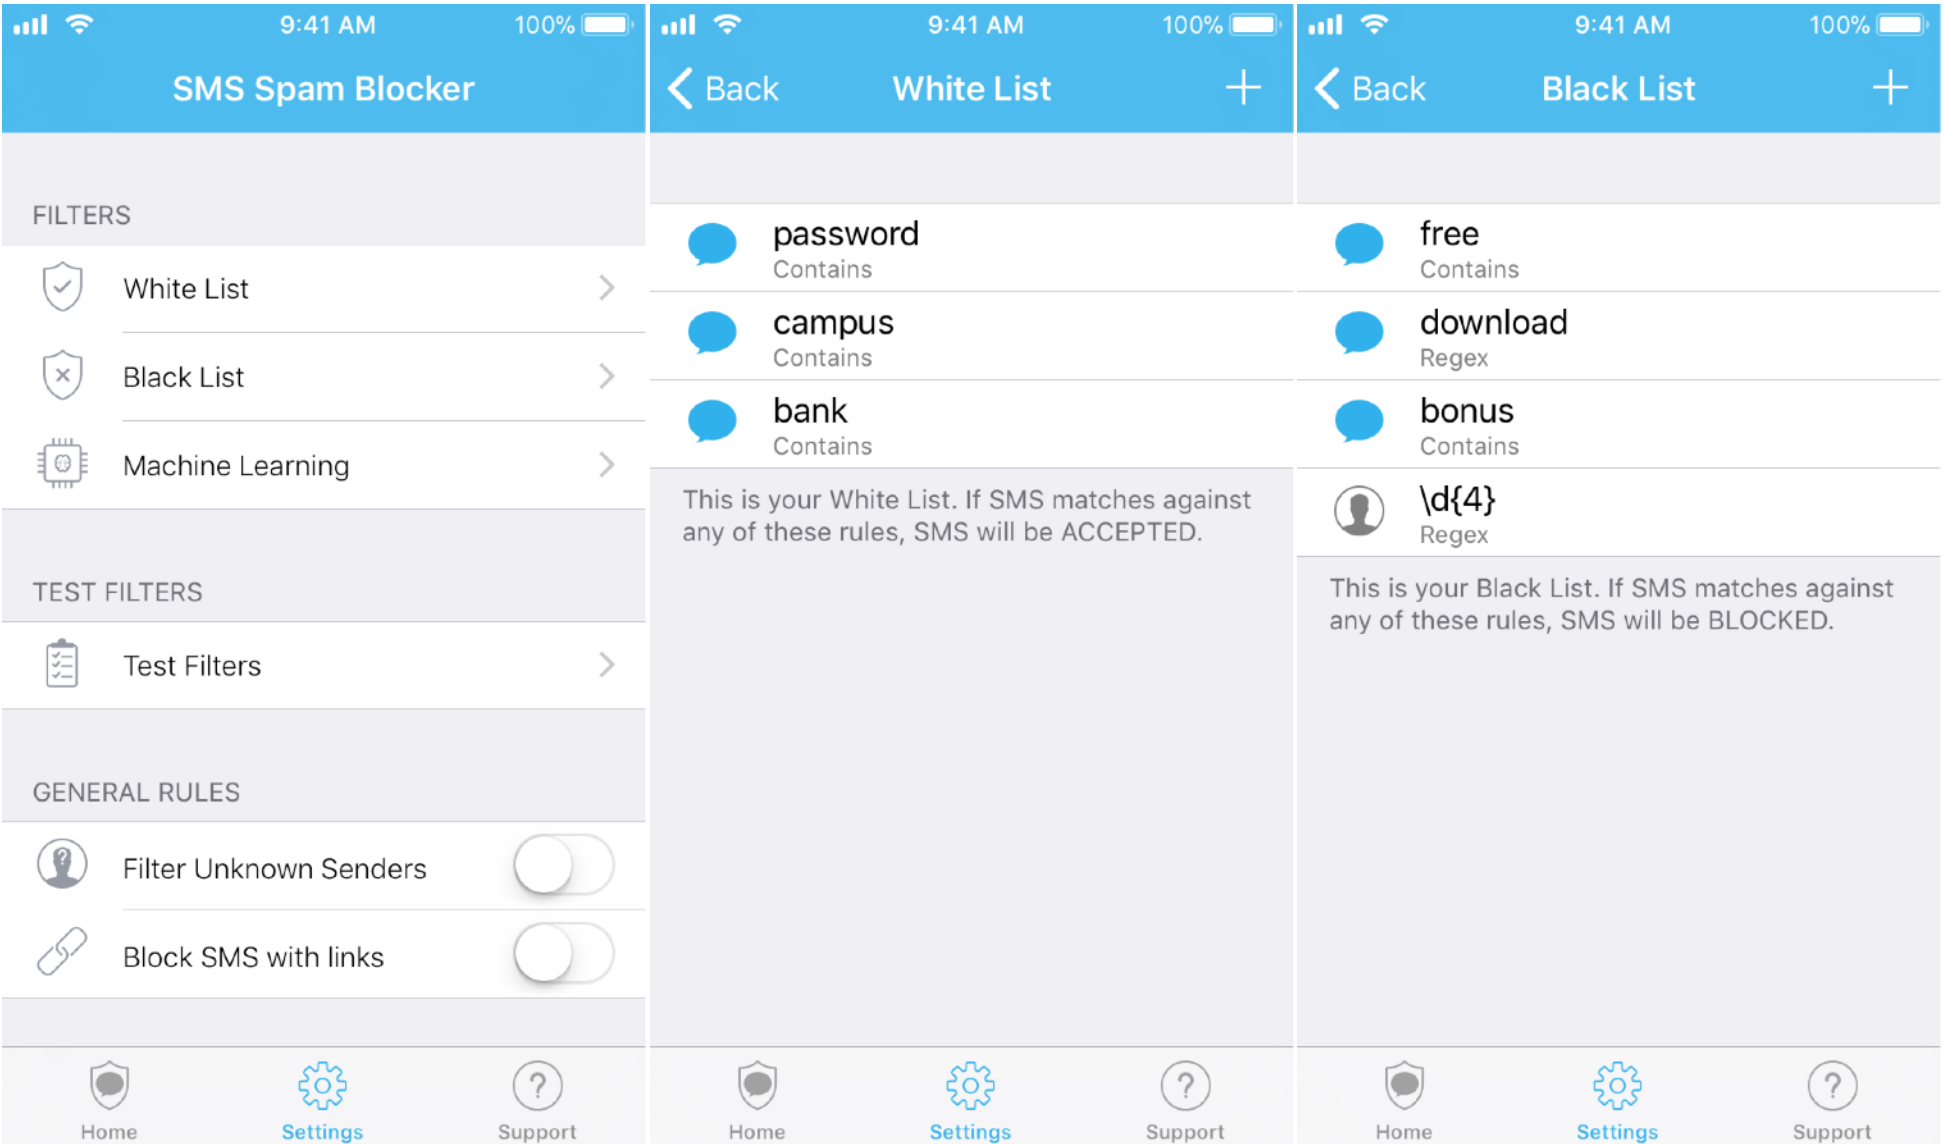

- Test Filters

You can test your filters and see what happens for given SMS message. You can easily tune your filters and see what is happening under the hood

We love your feedback. If you have any question or feedback or just want to say hi, please contact us by using our website, email or twitter
